Dear MR Weisberg,

Hello, hope your "Philips calculator" is serving you well, but, just a brief question I'd like to ask, if I may.

I read that many people are upset over the (JFK-upcoming assassination movie) being made presently - I would think even though MR Stone's movie, like many books, isn't able to portray 100% of the truth, is it that harmful to the American Public to see alternate views of JFK's murder? And like his part on the (3-hobo's), isn't it kind of strange that "ordinary bums" would have trimmed hair, clean shaves, and decent shoes?

This makes me question those routine bums true role or intentions? Their names should have been sought out somehow and isn't it also strange that two of the hobo's photo's resemble certain people who might have had a connection?? amazing!

Just a thought - I'm open minded. Thank you for your time sir, and best wishes and good health!

Sincerely,

Karl D. Salisbury
